Cybermissions is a 501c3 religious (Christian) organization and donations are tax-deductible within the USA.

*An online missions agency doing discipleship and training in the developing world and among the unreached.*

*Pastor Pablo lives in a small town in a developing country. He is a diligent pastor but has never been to bible college because the nearest evangelical bible college is in the capital city. Pablo cannot afford to go, and even if he could Pablo does not want to leave the church where he is a minister of the gospel.*

*However there is a small Internet café just down the road and Pablo can get free Wi-Fi at a local shopping mall after a short bus ride. The solution for Pablo is obvious. He should download training from the Internet onto his mobile phone then study it on his own at home, or even better, with a few friends who also want to learn about the Bible.*

*A friend tells Pablo about GlobalChristians.Org (a Cybermissions website) where Pablo can download the Harvestime training modules and sign up for free training ebooks and daily devotionals to be sent to his email. Pablo is excited and takes this opportunity. Eventually he starts a small bible college in his own church using our curriculum and trains his elders and church members.*

This story has been repeated thousands of times and is the basic work of Cybermissions.

*Students at a jungle bible college (in Venezuela I think) using the Harvestime courses to study.*

Cybermissions has four main websites and they are:  
GlobalChristians.Org  
NewTestamentPrayer.Com  
Cybermissions.Org  
BiblicalEQ.com

These websites enable Cybermissions to strengthen churches, pastors, and Christian leaders around the world as well as provide resources for Christians in search of the truth and good bible teaching.

We constantly add new material to these websites and seek to meet the most relevant needs of those in ministry in the Majority World.

Cybermissions does not do all of this on its own. We partner with 36 other organizations, church-planting and training movements. Sometimes we act as consultants to help them with digital ministry, and at other times we supply teaching materials, or do training at their annual conferences around the world. John Edmiston (our CEO) has about 15 countries that he travels to. Donations to help cover these mission trips are greatly appreciated. Trips to Thailand, Indonesia and the Philippines are scheduled for early 2017.

Mobile Ministry Forum

*Podcasting setup in John's office*

## Cybermissions Vision For 2017

- Finish the Cebuano translation of Harvestime courses.
- Initiate training of 5000 church planters in the Philippines with the Church Multiplication Coalition
- Get our Raspberry Pi based Internet cafes adopted in 15 developing countries as both learning and evangelistic platforms.
- Speak at missions conferences around the world such as SEANET, ICCM, CMTA in order to equip Christian leaders with digital strategies.
- Write a book on Cybermissions and Digital Strategies and get it published by year's end.
- Get a Cybermissions weekly podcast going.
- Improve the Cybermissions YouTube channel and make it highly effective.
- Develop a Digital Ministry Training online course
- Continue working with the Urban Leadership Foundation on a project to train 100,000 urban poor pastors.
- Use Olam Autoresponder to send ebooks to 25,000 people globally.
- Build up the Cybermissions volunteer base so that we can deliver more and deliver better.
- Improve our websites and increase the number of website "unique visitors" to 500,000 per month.

Please consider giving \$50 a month to the work of Cybermissions so that we can reach our annual budget of \$75,000—Thank You!
